About the Fund

The Pendal Global Select Fund (**Fund**) is an actively managed portfolio of global shares.

Investment Return Objective

The Fund aims to provide a return (before fees, costs and taxes) that exceeds the MSCI ACWI NR Index (net dividends reinvested) in AUD over rolling 5 year periods. The suggested investment timeframe is five years or more.

Description of Fund

The Fund is designed for investors who want the potential for long-term capital growth from a concentrated portfolio of developed and emerging market listed global equities, with an investment timeframe of 5 years or greater and are prepared to accept higher variability of returns.

The Fund's strategy is based on a belief that stock markets are inefficient and aim to exploit market anomalies via an investment process that combines both top-down and bottom-up research. As investment manager, JOHCM's distinct '4-Dimensional' investment process (stocks, sectors, countries, time/change) focuses on the behaviour of each share price to determine whether the most important driver of each prospective investment is stock specific, sector or country-based.

The Fund will typically hold 30-60 stocks and is benchmark agnostic.

The investment manager recognises that ESG factors can create risks and opportunities for companies and as such incorporates ESG risks into their analytical framework and portfolio construction. Further, the Fund employs exclusionary screens to avoid investments in companies that cause significant social and/or environmental harm.

The Fund will not invest in companies directly involved in either of the following activities:

- tobacco production (including e-cigarettes and inhalers); or
- controversial weapons manufacture (including cluster munitions, landmines, biological or chemical weapons, nuclear weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments).

The Fund will also not invest in companies which derive 10% or more of their gross revenue directly from any of the following activities:

- extraction, exploration, distribution, or refinement of fossil fuels, or fossil fuel-based power generation*;
- production of alcoholic beverages;
- manufacture, ownership or operation of gambling facilities, gaming services or other forms of wagering;
- manufacture of non-controversial weapons or armaments;
- manufacture or distribution of pornography; and
- uranium mining for the purpose of nuclear power generation.

Fund manager commentary

In June, most stock markets saw significant gains with several major indices reaching new highs as cyclical sectors outperformed defensive sectors and the US dollar fell to its lowest level in over three years.

The Fund marginally underperformed its benchmark during June. The main positive contributors to performance during the month included Coinbase, Jabil and Spotify. On the other hand, the main negative contributors to performance during the month included SAP, Deutsche Telekom and Nutanix.

The extraordinary US policy unpredictability has eroded the traditional 'safe haven' status of US assets, and many global investors are reassessing their allocations. We are underweight US equities, and overweight European and Asian equities, where we see a higher probability of a triple merit scenario: positive earnings revisions, rising valuations, and strengthening currencies.

One of the most significant things that we are seeing in terms of new equity market behaviour is the outperformance of value and small-mid caps over growth and large caps in World (ex-US), but the opposite in the US equity market where large-cap growth stocks continue to outperform value and small-mid caps.
