About the Fund

The Pendal Sustainable Balanced Fund (**Fund**) is an actively managed diversified portfolio that invests in Australian and international shares, Australian and international property securities, Australian and international fixed interest, cash and Alternative investments. Investments are selected based on a range of sustainable, ethical and financial criteria.

Investment Return Objective

The Fund aims to provide a return (before fees and expenses) that exceeds the Fund's benchmark over the medium to long term. The suggested investment timeframe is five years or more.

Description of Fund

This Fund is designed for investors who want the potential for long term capital growth and income, and diversification across a broad range of asset classes. The Fund invests in Australian and International shares, Australian and International property securities, Australian and International fixed interest, Alternative investments and cash.

The Fund may gain exposure to its asset classes by investing in shares, bonds, cash, or derivatives. The Fund may also invest in managed funds, exchange traded funds (**ETFs**), listed investment companies (**LICs**) and listed investment trusts (**LITs**) which invest primarily in such asset classes.

The Fund has a higher weighting towards growth assets than defensive assets.

The Fund has assets that are denominated in foreign currencies. This means that changes to the Australian dollar relative to foreign currencies may affect the value of the assets of the Fund. The International fixed interest and International property securities asset classes are fully hedged to the Australian dollar to the extent considered reasonably practicable. Generally, the Fund's International shares and Alternative investments exposures are partially hedged, though the extent of this may vary over time.

The Fund may use derivatives to achieve its investment objective and to gain exposure to the Fund's assets and markets. Derivatives may also be used to reduce risk and can act as a hedge against adverse movements in a particular market and/or in the underlying assets.

The Fund applies a sustainable approach to investments and applies exclusionary screens.

The Fund has a sustainability objective which aims to support the transition to a more sustainable economy (the **Sustainability Objective**).

We define a sustainable economy as an economic system which balances environmental, social, and economic factors.

The Fund aims to support the transition to a more sustainable economy, by aligning 50% or more of its capital (within the Australian and International shares, Australian and International fixed interest and part of the Alternative investments asset classes of the Fund) in aggregate with investments that advance this transition. We aim to do this by allocating capital to investments that in our view:

- support positive environmental and/or social change via their investment processes, use of capital and/or approach to active ownership; and
- avoid exposure to companies and issuers with business activities that negatively impact the environment and/or society.³

Market review

June was largely dominated by geopolitical headlines as Israel launched attacks on Iran, followed by US involvement, culminating in a cease-fire by the month's end.

The market largely shrugged off the conflict; oil prices spiked towards US\$75 a barrel, but declined again on de-escalation.

The equity market ploughed on, with the S&P/ASX 300 returning 1.4%.

There was further commentary on trade negotiations, with intimations that the US was nearing agreements with several key counterparts ahead of the 9th July deadline.

The Fed continued to take the view that there was no need to cut rates, preferring to keep their powder dry until there was greater clarity on the economic impact of tariffs.

There were indications that US consumer concerns about the impact of tariffs are receding.

In Australia, March quarter GDP data was weaker than consensus, but still reflects a slowing economy, rather than one facing recession. Inflation remains near the lower end of the RBA's target band and underpins expectations of two-to-three more rate cuts in 2025.

Fund performance

The Pental Sustainable Balanced Fund delivered a return of 1.56% (post fee) vs a Benchmark return of 1.85%. Equities continued to deliver solid positive returns in June, especially global equities, these drove total returns for the fund. The fund underperformed slightly vs its benchmark driven by negative active returns in Global shares and Alternatives which was slightly offset by Australian fixed income outperformance.

In Global equities strong momentum in large cap tech names again saw our value strategies underperform the index, also detracting was our Emerging markets strategy, where our underweight South Korea which rallied 35%, and overweight Indonesia which fell 12% detracted from returns as did stock selection within Chinese consumer stocks.

Asset Allocation was a small positive contributor as an overweight in US equities gained, which was partially offset by a small underweight in Australian shares.

We continue to manage downside risks by maintaining little or no exposure to the most expensive parts of equity and credit markets and complementing this with option protection where it has been attractively priced to implement. These include put options on the S&P 500, call options on the GBP against the US dollar, USD calls versus the Hong Kong Dollar and a put option on the USD against the Japanese Yen.

Outlook

The macroeconomic outlook and the uncertain path of inflation and monetary policy given changes to US trade policy represent a challenging backdrop for investors. We anticipate lower returns and elevated volatility from market cap benchmark reflecting high starting valuations and increasing concentration, but government bonds are offering less reliable diversification in the face of rising government debt, and elevated risk of sustained above-target core inflation.
